EDUCATION

Mar 2022 - Feb 2024

Master of Science in Electrical & Information Engineering

Seoul National University of Science and Technology

- Specialization in Applied machine learning.
- GPA: **4.0/4.5** with 33 credits

Oct 2016 - Sep 2021

Bachelor in Electrical & Electronics Engineering

Ho Chi Minh University of Technology

- The **Programme de Formation d'Ingénieurs d'Excellence au Vietnam (PFIEV)**.
 - GPA: 7.23/10 with **281 credits**
-

EMPLOYEMENT HISTORY

Jan 2023 - Now

Power System Study Engineer, LND Technical Services

- Perform power system studies for Transmission & Distribution projects, ensuring technical accuracy, and manage technical risks.

Mar 2022 - Feb 2024

Researcher, Intelligent Communications Lab., SeoulTech

- Researched existing machine learning algorithms, proposed and developed novel model to improve performance of telecommunication systems.
-

PROJECT

2022

Master thesis

Deep learning-aided channel estimation for IRS-assisted wireless communication

- Using Multilayer Perceptron Network to improve output performance of channel estimation process of an IRS system at low SNR (**up to 40%**).

2019

American Sign Language Translator

An open-source Python program to communicate with handicapped without knowing sign language.

- Convolutional neural network model using Keras/TensorFlow.
 - Able to detect the alphabet and more than 20 simple words.
-

PUBLICATIONS

2021

N. T. Kiet, N. T. M. Trung, N. P. Khai "Monitoring the solar rooftop system using Raspberry PI 3 Model B+". The 15th South East Asian Technical University Consortium (SEATUC). Indonesia. February 25-26, 2021.

ACHIVEMENTS

2022

75% tuition scholarship for all semester at SNUT, Korean professor scholarship

SKILLS

English - Professional

French - DELF B1 (B1 level)

Programming Languages: Python (main), Matlab, C#

Tools & Libraries: Git, Docker, PyTorch, Pandas, Scikit-learn, TensorFlow...
